### **DETAILED ACTION**

**Note:** *An attempt to contact the attorney of record was made on Friday, February 18, 2011, but it appeared the phone was not in service.*

*Examiner notes the correspondence of 1/25/2011 indicating the inventor's wish to abandon the application. However, to be abandoned, an express abandonment and fee need to have been submitted. If applicant intends to abandon this application without additional paperwork or fees, applicant should not respond to this office action and in 6 months from the mailing date of this action, the case will be abandoned.*

### ***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Saby et al. (US 4,907,675). Saby et al. disclose a ladder (figure 3) comprising a plurality of sections (14, 15), each section having two rails and a plurality of generally uniform steps placed between and connected at each end of the step to one of the rails (figure 3), causing the rails to be spaced apart by the width of the steps and means for connecting (18, 19) one section of the rail to another section at the ends of the rail (figure 3); wherein said rails are circular in cross-sections (figure 3) and rail means for connecting the sections together comprises a section of tubing (18, 19) that slides over one end of one rail in one section and also slides over one rail in a second section (figure 3).

***Response to Amendment***

The amendment filed August 17<sup>th</sup>, 2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: It appears that drawings submitted 8/17/05 contain new matter and the attorney of record did not state in the preliminary amendment that no new matter had been entered. Therefore, the

amendments of 8/17/05 have not been entered and the original claims, drawings and specification of the 9/22/03 disclosure were examined

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
